

AGM 8 Report – Centre Scribes

We have continued to work on both the SF SE Notes and the production of 4 newsletters a year since May 2019. IN 2023 we are pleased to report contributions from members has continued, resulting in greater input for the scribes to include in the publications we are responsible for.

Safety Fast

Our main objective is to communicate to the centre via SF the events coverage and promotion of key centre activities with articles and photos. In addition, Coverage post events is key to encourage members to attend in the future by showing what they missed. It is also important for reaching those members who are not linked to the centres email distribution or social media content.

Newsletters

The Newsletters continue to cover both Natter and Wanderers events in detail including information of future events. It is also a platform for the committee to communicate activities and increase awareness of the centre in action. Last year the circulation increased with natter and wanderer leaders hopefully increasing the distribution directly.

Last year we received numerous excellent contributions and articles relating to MG's and beyond. Past and current Newsletters are also on the website for those that are not registered to receive them by email.

We are also grateful for the sponsorship by Cherished Insurance in 2023 which all goes to help centre funds. We are pleased to report Cherished complimented us on the quality of the Newsletter.

In 2024 we aim to continue to our work on both SF and Newsletter and we would like to see additional member contributions to enhance the Newsletter interest. We plan considerable coverage of the MG100 events.
